

Nguyen Van Cuong

Front-end Developer

Dob: 07/04/1995

Gender: Male

Phone: 090 1800 274

Email: ncuong0704@gmail.com

Address: Tran Tan, Tan Son Nhi Ward, Tan Phu District.

OBJECTIVE

- I am a Front-end Developer with 3 years of experience in translating Figma designs into responsive web interfaces and collaborating with PHP teams to implement website functionalities.
- Currently focusing on advancing expertise in Front-End development while expanding into Shopify. With prior experience, confident in delivering high-quality Front-End solutions.
- Seeking a professional work environment where I can apply my existing skills to contribute to the company, while learning and developing advanced skills for personal growth in my career.

SKILLS

Programming Languages	HTML5, CSS3 (Flexbox, Grid), JavaScript (ES6+), TypeScript, Liquid (Tags, Filters, Objects)
Libraries & Frameworks	ReactJS, NextJS, Tailwind CSS, Material UI, Ant Design, jQuery
Status management:	React Hooks, Redux, Redux Toolkit, Redux Saga, Redux Thunk
API:	RESTful API
Professional skills:	Responsive Web Design, Cross-browser Compatibility, Performance Optimization, Accessibility (a11y)

WORK EXPERIENCE

2020 - 2024

Derasoft Co., Ltd

Frontend Developer (HTML, CSS, JavaScript)

- Developed and maintained web applications using JavaScript (ES6+), ensuring stability, performance, and maintainability.
- Optimized application performance by improving page load speed, resolving technical issues, and enhancing user experience (UX).
- Collaborated closely with the development team to maintain high code quality and meet project deadlines.
- Contributed to the success of various projects, notably achieving up to a 30% improvement in page load speed and effectively optimizing user interface (UI) design.

2023 - 2024

Bluesky Vietnam Technology Joint Stock Company

Frontend Developer (React JS, Next JS)

• Strengthened expertise in React.js and Next.js through in-depth learning and practical application in real-world projects.

- Participated in the development of e-commerce applications by implementing new features, resolving technical issues, and ensuring system stability—contributing significantly to overall project success.
- Designed and optimized intuitive, engaging user interfaces (UI) while enhancing interactive user experiences (UX) to meet end-user needs and expectations.

PROJECTS

Nuskin Affiliate

(2024 - 2025)

Client	Nuskin, Vietnam
Description	The client requested the development of a website for Affiliate partners, enabling users to create personalized storefronts with customizable designs. Products are presupplied by the provider and can be added to the store with ease. Users may also submit their own products, which require provider approval before being displayed. The system also includes order management functionality.
Team Size	4
Position	Frontend Developer
Responsibilities	 Designed and developed the management interface for Affiliate partners, covering account, orders, products, discounts, and reporting pages. Integrated drag-and-drop layout customization and Firebase for real-time notifications. Collaborated with the Back-End team to configure forms and logic for enhanced user experience. Ensured cross-device and cross-browser compatibility, and provided client guidance on effective interface customization.
Technologies Used	HTML, CSS, JavaScript, Firebase

Game Avatar Nuskin

(2022 - 2024)

Client	Nuskin, Indonesia
Description	Developed a website with features inspired by the Avatar game, allowing users to register accounts, create customizable characters with expressive emotions, and move between interactive halls. Admins can design and manage these halls through a dragand-drop interface in the admin panel.
Team Size	4
Position	Frontend Developer
Responsibilities	 Researched and implemented realtime technology to ensure smooth, synchronized interactions. Utilized HTML, CSS, JavaScript, and Firebase to build core features including character creation, map setup, and teleport zones between halls. Guided clients in using the admin panel for customizing maps and configuring movement. Optimized UI for cross-device compatibility and provided real-time technical support during live events.
Technologies Used	HTML, CSS, JavaScript, Firebase

(2023 - 2024)

Client	Thien Hoang Phat Corp
Description	Developed an e-commerce website tailored for drivers, featuring a point system where users purchase codes from Vata to redeem shopping credits. Integrated a lucky spin game for prize giveaways and designed an optimized, user-friendly, and transparent point and code management system.
Team Size	20
Position	Frontend Developer
Responsibilities	 Designed and developed user-facing layouts, including product search and product detail pages. Built and managed admin layouts, such as shop management, driver ranking, and order management. Conducted interface testing to ensure compatibility across all devices and browsers. Addressed bugs based on code reviews or tester feedback to ensure the final product's quality.
Technologies Used	Next JS, React JS, Tailwind CSS, Ant Design

Thanh An Autocare

(2023 - 2024)

Client	Thanh An Autocare
Description	An e-commerce website specializing in tires, featuring efficient product management, a user-friendly shopping cart, and SEO optimization for high Google rankings.
Team Size	8
Position	Frontend Developer
Responsibilities	 Write clean, SEO-optimized HTML code, ensuring smooth performance across all devices. Optimize page loading speed to enhance user experience and collaborate closely with the SEO team to maximize SEO effectiveness.
Technologies Used	HTML, CSS, JavaScript
